

THINK NEXUS

What are the main focus areas?

SCIENCE AND TECHNOLOGY

INNOVATION AND ENTREPRENEURSHIP

POLICY

THINK NEXUS

Think tank for the
collaboration on NEXt
generation Internet
between EU - US

How it works?

Think NEXUS establishes and operates a Think Tank of highly credible experts from the EU and US, which is organised in working groups that create and reinforce partnerships in three focus areas related to future Internet technologies and practices.

What are Think NEXUS' objectives?

- Create a bridge between EU and US NGI ecosystems
- Boost strategic research, industrial partnerships and policy compliance among the respective communities of the NGI areas
- Reinforce EU-US collaboration opportunities through the dedicated Think Tank

Think NEXUS has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 825189. This publication reflects only the author's view and the Commission is not responsible for any use that may be made of the information it contains.

Who is involved?

Researchers, entrepreneurs and policy makers from both sides of the Atlantic on Next Generation Internet (NGI) related thematics.

Why Think NEXUS?

The Internet of the future should be more open and foster a greater involvement and participation from different stakeholders. Thus, the EU's NGI initiative is a key opportunity to rethink the current way the Internet works and to develop a vision involving voices from across Europe and beyond emphasizing collaborations with the US.
